

WHY US?

Large Production Capacity with Preferred Quality Control (200 pipes per day)

Efficient Logistic Support

State-of-the-art Infrastructure & Advanced Manufacturing Processes.

Customer-Centric Approach

Transparent Business Practice

Products of High Dimensional Accuracy

Reduced Curing Time due to use of Sprinkler Technology

Company Profile

Kalokhe pipes and precast Industries mostly work in the RCC pipes & precast field. The company is in this field since 2018 and shares the brother bond with Shri Ambica Stone Crusher, who are experts in the field of quarrying stone crushing for the last 30 years.

The mission of the company is to build a trustworthy supply chain of construction materials using quality mark-based materials along with 'high-end technology' with a team of experts.

Our team's constant quest to deliver best-in-class products has enabled us to sustain the top-class quality of all ingredients by performing rigorous testing, applying stringent protocols on process parameters, and monitoring key properties of concrete in fresh as well as the hardened state.

Leading Manufacturers of
RCC Pipes, Jacking Pipes, Box Culverts,
Manholes, & Other Precast Products,
By Vertical Vibrator Casting Technology.

KALOKHE

PIPES & PRECAST INDUSTRIES

Leading Manufacturers of
RCC Pipes, Jacking Pipes, Box Culverts,
Manholes, & Other Precast Products,
By Vertical Vibrator Casting Technology.

RCC PIPES (Hume Pipes)

Reinforced concrete pipes (RCC) are manufactured by a vertical casting process in which mechanically mixed concrete and reinforcement cage extends throughout the barrel of the pipe.

Our Product Range: 450mmid to 2600mmid

RCC JACKING PIPES

We manufacture a comprehensive range of high-quality jacking pipes to suit the requirement of the latest generation of the jacking system.

Our Product Range: 600mmid to 2000mmid

RCC HDPE LINED PIPES

HDPE-lined RCC pipes are generally used for sanitary and gravity piping systems.

Our Product Range: 600mmid to 2600mmid

RCC PRECAST MANHOLES & CHAMBERS

We manufacture precast manholes entirely in our factory, giving the contractor a product that simply needs to be aligned and installed at the site.

RCC U-DRAINS CHANNEL SECTIONS

Precast U-drain of various sizes can be customized to different sizes. It also saves a lot of time in laying while preventing waste of labour.

RCC PRE-CAST BOX CULVERTS

Box culverts are used for cross drainage on highways and in stormwater drains. We can use our casting machine to manufacture box culverts in sections and supply them to construction sites for easy installation.

RCC CABLE TRENCH

RCC cable trenches are used for the efficient laying of cables, electric wires, and other connecting cables.

Ranging Applications

Our products with BIS certification are used in water mains, sewers, culverts, irrigation, conveyance of treated fluids & effluents, heavy roadside drainage & cross drainage. Also in sensitive areas, under railways, motorways, rivers, canals, buildings, crowded urban sites, etc.
